

DELIVERING EFFECTIVE SOLUTIONS FOR REOPENING YOUR BUSINESS

LeChase provides workplace modifications to help clients safely welcome back their employees

CASE STUDY

With many offices reopening across New York State, businesses are looking for workplace modifications to help keep employees safe. For one financial services firm, that effort included addressing important common areas like the cafeteria at its Purchase, N.Y. complex. LeChase quickly mobilized to assist – installing plexiglass barriers to help shield cafeteria workers and customers at each of the various staffed and self-serve food stations as well as in checkout lines. Work was completed within two weeks, in time for employees to begin returning on-site.
