

We asked members of Women at LeChase

**What motivated you  
to get into construction?**

## Monica Grundtisch

*Operations Support Manager / Rochester*

"I fell into it, but once I was here, I realized it's an industry of evolution and creation. It's exciting to be part of something bigger where you can see the results of everyone's contribution to a project."

## Courtney Lafferty

*Project Manager / Rochester*

"Growing up, I wanted to become an architect. After starting architecture school, I quickly learned that I did not want to work in AutoCAD or Revit everyday. But I did enjoy problem solving, physically seeing progress, and working in a team environment. Entering the construction industry was one of the best decisions I have ever made - There are so many career opportunities paths, and wonderful people. There is never a dull moment."

## Nadine Letourneau

*Project Engineer / Southeast*

"Watching buildings 'come to life' and seeing how all the building materials come together to form a structure."

## Kathryn Payne

*Project Executive / Southeast*

"I always loved buildings and problem solving. When I found out construction management was a career path, I knew I had found what I was meant to do."

## Alex Fleischer

*Assistant Project Manager / Rochester*

"I love that even starting as a project administrator then project engineer it's still not a typical desk job. (Construction is) also a field with career stability and progression with a diverse range of roles and responsibilities. I am currently an onsite assistant project manager who also performs assistant superintendent tasks daily. No day is the same and with each challenge are opportunities and a feeling of accomplishment."

## Lynette Cox

*Project Engineer / Southeast*

"Being in the field. I like to see the building process as it's happening, in real time. It's just rewarding, it never gets old."

Celebrating Women in Construction Week 2023

**Thank you to all the women at LeChase  
for their contributions to our industry.**
